2. Feature Selected: Collapsed Navigation Menu (Mobile View / Small Screens)
Issue Identified:

When the collapsed menu is clicked, the dropdown options are overlapping and poorly displayed.

It's hard to identify menu options due to lack of spacing, background contrast, or clear separation.

Suggested Improvement:

Add padding and spacing between items.

Provide a visible background or border to avoid overlap.

Implement hover/active states and better font contrast for readability.

Why This Helps:

Improves usability on mobile devices and small screens.

Makes navigation smoother, clearer, and more user-friendly.

Prevents confusion and improves the overall professionalism of the site.
